BibTeX bibliography style `chicago18ad.bst` for the Chicago author–date citation style

David Lamkin*

March 9, 2026

This document describes a new BibTeX bibliography style file to assist LaTeX users with the preparation of a bibliography in author–date style according to the *Chicago Manual of Style*, 18th edition (University of Chicago Press 2024).

The style file builds upon and updates previous Chicago-style `.bst` files to produce a bibliography more-or-less in 18th edition Chicago author–date style, such that:

- it works with `natbib` 8.31b to produce `\bibitem` entries in the form `\bibitem[Jones et~al(1990)Jones, Baker and Smith]{key}...`
- the number of authors' (or editors') names listed in the bibliography is reduced to a maximum of six, or truncated to three 'et al.' if there are any more
- DOI is used as first choice of online source for all items: the style file outputs the DOI if both `doi` and `url` are in the database entry, or outputs the URL (plus access date, if given) if there is no `doi`
- `@book` and `@inbook` entries can contain editors (even series editors) in addition to authors, as occurs frequently in the humanities
- `@article` entries can contain an editor, for citing a special issue or special section of a journal
- place of publication (`address`) for book publishers is not output
- the non-standard entry types `@magazine`, `@newspaper` and `@webpage` are recognised for compatibility with other bibliography styles

This document is a work in progress. It will eventually become a complete user guide with examples and discussion.

Setting up to use the style file

The `.bst` file is fully compatible with the `natbib` package. I have found the preamble settings

```
\usepackage[sort]{natbib}
\bibpunct[, ]{(}{)}{;}{a}{}{,}
```

most useful during development and testing.
